STEP 4. Choose a wallet username

Setting up the Coinbase wallet, you need to pick your own username. This username other Coinbase Wallet users easily to send you crypto.

Pick your username

This is how other Wallet users can find you and send you payments.

STEP 5. Set privacy preferences

You can share your username to public for other users to send you crypto or you can keep the username private also.

Set your privacy preferences

You can always change this later in settings

Public *Recommended*

Other Wallet users can search for my username and send me crypto

Private

Other Wallet users cannot search for my username

Crypto transactions take place on public blockchains. When your username is set to Public, advanced users can look up your addresses on the blockchain and view your transaction history.

METAMASK

Help us improve MetaMask

MetaMask would like to gather basic usage data to better understand how our users interact with the mobile app. This data will be used to continually improve the usability and user experience of our product.

MetaMask will...

- ✓ Always allow you to opt-out via Settings
- ✓ Send anonymized click & pageview events
- ✓ Send country, region, city data (not specific location)
- ✗ Never collect keys, addresses, transactions, balances, hashes, or any personal information
- ✗ Never collect your IP address
- ✗ Never sell data for profit. Ever!

This data is aggregated and is therefore anonymous for the purposes of General Data Protection Regulation (EU) 2016/679. For more information in relation to our privacy practices, please see our Privacy Policy [here](#).
